

dssetarrayelement

June 2, 2019

Abstract

Set the value of an array element This task is part of the daltools package

1 Instruments/Modes

Instrument	Mode
------------	------

2 Use

3 Description

Set the value of an array element.

Set each (or a range of) null-valued elements in each of the given arrays to a new value.

4 Parameters

This section documents the parameters recognized by this task (if any).

Parameter	Mand	Type	Default	Constraints
arrays	yes	ArrayList		

List of fully qualified array names

elements	no	Int	0	
-----------------	----	-----	---	--

Number of elements to set. 0 means all elements from element to end of the array (inclusive)

fromelement	no	Int	0	
--------------------	----	-----	---	--

Number of the first element to be set.

value	yes	String		
--------------	-----	--------	--	--

Value to set

5 Errors

This section documents warnings and errors generated by this task (if any). Note that warnings and errors can also be generated in the SAS infrastructure libraries, in which case they would not be documented here. Refer to the index of all errors and warnings available in the HTML version of the SAS documentation.
