

Dataright Proposals				
Proposal ID	Title	PI	Country	Category
930028	INTEGRAL observations of Galactic X-ray bursters	Sanchez-Fernandez	Spain	Galactic Astronomy
930030	Monitoring the evolution of 10 known Northern hemisphere black hole binaries during open time programs	Rodriguez	France	Galactic Astronomy
930031	Monitoring 8 known transient sources at high energies during open time proposals	Cadolle Bel	Spain	Galactic Astronomy
930035	The evolution of Comptonization in XTE J1701-462: from A to Z	Paizis	Italy	Galactic Astronomy
930037	Monitoring the peculiar microquasar GRS 1758-258	Cadolle Bel	Spain	Galactic Astronomy
930038	The spectral characteristics of young and energetic rotation powered pulsars at soft gamma-ray energies	Kuiper	Netherlands	Galactic Astronomy
930040	Non-Thermal X-ray and Gamma-ray Emission from Cyg X-3	Tomsick	USA	Galactic Astronomy
930041	Searching for time variability and detecting new magnetars in the INTEGRAL band	den Hartog	USA	Galactic Astronomy
930044	IGRJ16328-4726: confirmation of its recurrence time and its supergiant fast X-ray transient nature	Fiocchi	Italy	Galactic Astronomy
930045	INTEGRAL AO-9 Data Rights Proposal on HESS J0632+057	Bordas	Germany	Galactic Astronomy
930046	Monitoring the Evolution of 17 of the Known Black Hole Binaries in the Galactic Centre during Open Time Programs	Grinberg	Germany	Galactic Astronomy
930048	Measuring the high energy emission of accreting millisecond X-ray pulsars.	Ferrigno	Switzerland	Galactic Astronomy
930050	The still not very well known X-ray pulsar 4U 1909+07	Kreykenbohm	Germany	Galactic Astronomy
930051	Catching Magnetars' Bursts on the Fly with INTEGRAL	Götz	France	Galactic Astronomy
930052	Searching for cyclotron lines in Supergiant Fast X-ray Transients spectra	Sidoli	Italy	Galactic Astronomy
930054	Monitoring Transient Accreting X-ray Pulsars with INTEGRAL	Caballero	France	Galactic Astronomy
930056	Catching the onset of magnetospheric instabilities in EXO2030+375	Klochkov	Germany	Galactic Astronomy
930057	Hard X-ray emission of Cataclysmic Variables	Landi	Italy	Galactic Astronomy
930059	INTEGRAL monitoring of Supergiant Fast X-ray Transients associated with unidentified transient MeV-GeV sources	Sguera	Italy	Galactic Astronomy
930060	Monitoring the behavior of 4U 1907+09	Kreykenbohm	Germany	Galactic Astronomy
930061	Periodic signal from Ultra Compact X-ray Binaries with INTEGRAL	Fiocchi	Italy	Galactic Astronomy
930063	The persistent black hole candidate 1E 1740.7-2942: long term behaviour and rapid changes	Bazzano	Italy	Galactic Astronomy
930064	Exploring the orbital profile of the circumstellar environment in SFXTs	Drave	United Kingdom	Galactic Astronomy
930065	Study of three accreting X-ray pulsars with INTEGRAL	Ducci	Germany	Galactic Astronomy
930066	INTEGRAL monitoring and characterization of poorly known candidate Supergiant Fast X-ray Transients	Sguera	Italy	Galactic Astronomy
930067	Data right proposal for the shell-type supernova remnants CTB 37A and CTB 37B	Puehlofer	Germany	Galactic Astronomy
930068	Hard X-ray emission in LMXB transients harboring a Neutron Star	Natalucci	Italy	Galactic Astronomy
930069	INTEGRAL monitoring of Long X-ray bursts	Chenevez	Denmark	Galactic Astronomy
930070	INTEGRAL monitoring of a sample of Very Faint X-ray Transients	Del Santo	Italy	Galactic Astronomy
930071	Investigating the mystery of supergiant fast x-ray transients	Bozzo	Switzerland	Galactic Astronomy
930074	Symbiotic X-ray Binaries: a Mysterious Subclass of Accreting Pulsars	Mueller	Germany	Galactic Astronomy
930076	Study of unidentified Transient sources discovered by INTEGRAL: search for the nature	Tarana	Italy	Galactic Astronomy
930077	Carrying on an in-depth study of LMXB candidates	Tarana	Italy	Galactic Astronomy
930080	INTEGRAL analysis of LS I +61303 (GT 0236+610) data based on its 4.6 yr radio periodicity	Zimmermann	Germany	Galactic Astronomy
930085	Study of the transient X-ray source IGR J17464-3213 during the outburst in 2012	Grebenev	Russian Federation	Galactic Astronomy
930086	Request for data rights to IGR J16318-4848	Barragan	Germany	Galactic Astronomy
930029	Hard X-ray Emission from M 87	Beckmann	France	Extragalactic Astronomy
930033	Constraining the SED of low-beamed Fermi/LAT detected AGN	de Jong	France	Extragalactic Astronomy
930036	The hard X-ray properties of the narrow line Seyfert galaxy NGC 5506	Soldi	France	Extragalactic Astronomy
930042	INTEGRAL observation of two hard X-ray selected LINERs	Malizia	Italy	Extragalactic Astronomy
930049	Multiwavelength monitoring of NGC 5548 - INTEGRAL hard X-ray observations	Paltani	Switzerland	Extragalactic Astronomy
930055	NGC 4388: intrinsic emission or circumnuclear gas variability?	Panessa	Italy	Extragalactic Astronomy
930058	Simultaneous Broadband Spectral Observations of 3C 111	Grossberger	Germany	Extragalactic Astronomy
930062	Revealing the nature of the TeV-sources IC 310 and NGC1275	Eisenacher	Germany	Extragalactic Astronomy
930081	Study of INTEGRAL X-ray sources in the LMC	Grebenev	Russian Federation	Extragalactic Astronomy
930084	INTEGRAL Observations of Blazars in Outburst	Bianchin	Italy	Extragalactic Astronomy
930043	More Detailed Search For Unpredicted Gamma-Ray Lines With SPI	Watanabe	USA	Nucleosynthesis and diffuse emission

Note: A detailed list with the allocation of sources to observers associated to the observing proposals will be available at the ISOC Website
