

# dssetdata

June 2, 2019

## Abstract

Copy an object's data to another object This task is part of the daltools package

## 1 Instruments/Modes

Instrument	Mode
------------	------

## 2 Use

## 3 Description

Copy an object's data to another object. The source and destination must be the same type of object

This task copies the data from an object to another object. Note that the source and destination objects must have the same type (i.e. either both columns or both arrays).

## 4 Parameters

This section documents the parameters recognized by this task (if any).

Parameter	Mand	Type	Default	Constraints
<b>from</b>	yes	String		

Fully qualified name of source array or column. Must have the same type as 'to'.

<b>to</b>	yes	String		
-----------	-----	--------	--	--

Fully qualified name of destination array or column. Must have the same type as 'from'.

## 5 Errors

This section documents warnings and errors generated by this task (if any). Note that warnings and errors can also be generated in the SAS infrastructure libraries, in which case they would not be documented here. Refer to the index of all errors and warnings available in the HTML version of the SAS documentation.
